Abrégé pour FR2828924

The invention concerns a flexible pipe for transporting a fluid comprising an outer sealing polymer sheatt (6), at least a pair of armor wraps (4, 5) helically and long-pitch wound, and a polymer pressure sheath (2). The invention is characterised in that the pressure sheath (2) consists of an inner tube (7) arranged i an outer tube (8), and grooves (9) are arranged on at least one of the surfaces (10, 11) opposite said inner and outer tubes (7, 8).
